

AOL Report **Techno-MBA Program Assesement (2013)**

The Techno-MBA Program (TMBA) prepares students by helping them to build distinctive capabilities and leadership skills to be competitive professionals in a global environment. Students undergo a carefully structured program to improve their knowledge on organizations, management, strategic thinking, business ethics and marketing skills. The program is ideal for those pursuing a career as a global business leader.

- Overall summary of findings

From the result of the performance of Assurance Of Learning (AOL), 5 learning goals in each class generally meet expectations.

According to the results of AOL (Assurance of Learning), in general all the classes met the required standards. However, the learning goal related to global perspective (Learning goal 31: Our student will define global business issues and relate these to emerging business opportunities.) is relatively low compared to the other measures in MGT513, MGT514 and MGT561.

On the other hand, the learning goal related to ethically & socially conscious reasoning (Learning goal 4: Our graduates will understand the gravity of ethical behavior and corporate social responsibility), shows a reasonably high level of performance.

- Limitation

The number of samples collected for this survey, was sufficient enough to state the following outcomes. However, due to different response rates between classes, the results cannot be justified for full support of the outcomes of the survey. The results might not be fully accurate because not all of the students responded to the survey and the response rates of each class differ for each learning goal.
