## **Overall Review**

The Executive MBA (EMBA) program prepares middle and upper level professionals for successful careers in general management. The EMBA program aims to strengthen essential qualities of general managers and develop and nurture middle and upper professionals to become leaders who are creative and innovative. In general, general managers have personal qualities and skills including organization leading, human resource leading, and effective communication and collaboration.

Based on these personal qualities and attributes, we establish four learning goals for the program; team building and task management, global perspective, understanding of ethical problems, and business problem-solving. In order to assess the accomplishment of each learning goal, we utilize various methods including evaluation of team project presentation, course-embedded survey on students, OPI test results, and many more.

All assessment methods suggest that EMBA program significantly meets the expectation in terms of Assurance of Learning (AoL). More precisely, the average score of four learning goals exceeded 2 (i.e. 'Meets Expectation'). Therefore, we can conclude that EMBA program is fully qualified to be an AACSB member.
