

AOL Report Information&Media MBA Program Assesement(2015)

The Information & Media MBA (IMMBA) Program prepares middle and upper level professionals for successful careers in general management. The program takes a very intensive format to finish the whole curriculum within a year. The IMMBA Program aims to delve into the concepts of IT management strategy, communication skills, information and communication technology, digital media & contents industry, business analytics with a firm background in the basic principles of business management. With this setting, we will develop global professionals who can create new growth momentum through the convergence of IT, digital contents, business analytics and the industrialization of IT, media, and business analytics.

- Overall summary of findings

From the result of the performance of Assurance Of Learning (AOL), 4 learning goals in each class generally meet our expectations. According to the results of AOL (Assurance of Learning), all the classes met the required standards. For example, the learning goal related to the effective communication (Learning Goal 2: Our graduates will be effective communicators) show reasonably high level of performance. In summary, the result implies that our students will graduate with required competence in business.

- Limitations

The number of samples collected for this survey, was sufficient enough to state the necessary outcomes. However, due to different response rates between classes, the results cannot be justified for full support of the outcomes of the survey. The results might not be fully accurate because not all of the students responded to the survey and the response rates of each class vary depending on each learning goal.
