

AOL Report Finance-MBA Program Assessment Closing the Loop for 2016 & 2017

- **Overall summary**

Over the past two years, the results have not shown a clear improvement in overall AOL assessment. However, unlike the previous year, there are no evaluation traits that have received scores below expectations. Although it showed an increasing score for L1, 'Communication', it shows that many students are having difficulty with L2, 'Analytical Thinking', for this year. Students showed a better picture of the traits related to the presentation, especially in terms of delivery part, but more difficult in the technical part of the lesson. As for the traits of L3 and L4, it was hard to find any upward or downward sharpness. FMBA is a process to help students acquire the concepts and skills needed to deal with various financial problems that will face the future. Helping students understand through tutorial sessions, quizzes, or watching videos can also be a way for better instruction.
