

AOL Report Professional MBA Program Assessment (2017)

The Professional MBA Program (PMBA) is designed for students who want to develop and strengthen their careers to become professionals while incumbency. The program provides evening classes during week days and it requires three years to complete. There is also an acceleration path for students who wish to complete the program in two and a half years.

- Overall summary of findings

Six learning goals have been established for PMBA program to achieve the learning objectives and from the result of the performance of Assurance of Learning (AOL), all of the 6 learning goals of PMBA program meet expectations; the average score for each learning goal is 2.91, 2.86, 2.74, 2.88, 2.85, and 2.83 from L1 to L6 respectively.

The most successfully achieved learning goal is 'Communication competency'(L1), of which score is very close to 3 on average, which shows the superior achievement of this program respect to the standards of AOL.

The most poorly evaluated learning goal is 'Leadership and teamwork' (L3). The result proposes that this program should be more encouraged to provide students the opportunity to improve leadership and team management skills.

- Limitation

The number of samples collected for this survey was sufficient enough to state the following outcomes. However, different response rates among classes could bias the outcomes in this report. Since the survey (or the evaluation) was not conducted for every student, the results would not possibly reflect the true status of subsets of students.
